Locate a permalink for easy future access

1.) Run a search as you would normally and open the article that you like.
2.)
3.) Under the “tools” menu, click on the permalink button.
4.) The link provided here, after you click the permalink button, can easily be saved in a word document. This link would be the quickest way to return to a specific article in the Virtual Library.

If working on a big research project, consider saving the APA citation (provided in the same tools menu) the permalinks in one word document as you work.
